

Converte™

Foliar Spray

SUPER CONCENTRATE

The Converte universal natural plantfood was scientifically designed to feed soil and plant systems nutrients in a balanced formulae to enable health benefits to flow from the soil to the plant to livestock and to human populations. This unique product has been extensively trialled and tested in the Riverina region of NSW over a period of 10 years leading to the launch of Converte UNP in 2013. This liquid concentrate is derived from natural resources and is compounded according to a system of ecological balance with chelation and natural chemistry. Converte contains mineral trace elements, phytoproteins, vitamins, seaweed extracts and plant hormones that together help to restore natural soil microbes and micro-organisms in soils.

This foliar spray has been specially formulated for controlled nutrient input and ease of use across lawns, plant foliage, patios and balconies, to promote healthy growth, flowering and fruiting, enhance colour in foliage and flowers, increase resistance to pests and diseases.

Nutrients applied to the foliage are generally absorbed more rapidly than when applied to the soil. Foliar application provides a means of quickly correcting plant nutrient deficiencies.

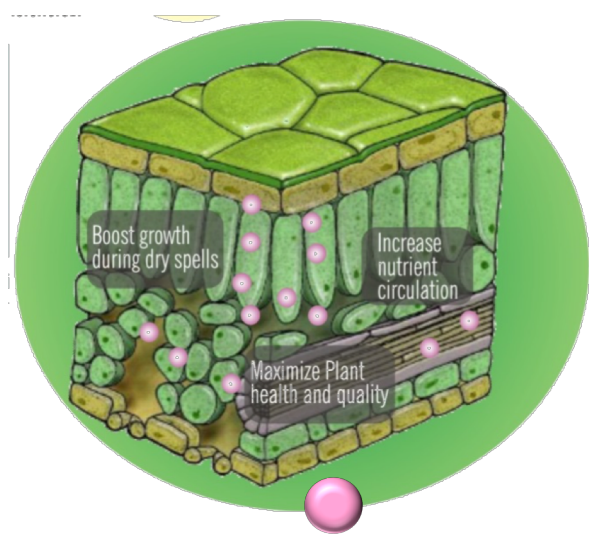

Observed benefits include:

- Instant results
- Prolong bloom
- Increase crop yields
- Boost growth during dry spells
- Increase cold and heat tolerance
- Increase pest and disease resistance
- Maximize plant health and quality
- Help the internal circulation of the plant

For use with conventional and organic production on:

Horticulture, Broadacre, Hydroponics, Home Garden, Pasture Improvement, Feed Stock Improvement

Increased depth and breadth of nutrients for soil, plant, animal and human health
