

Converte®

SUPER CONCENTRATE

seed primer

The Converte Universal Natural Plantfood was scientifically designed to feed soil and plant systems nutrients in a balanced formulae to enable health benefits to flow from the soil to the plant to livestock and to human populations.

Our seed primer has been specially formulated to deliver the most complex and balanced nutrient treatment directly into the seed. The seed embryo then has higher access to nutrients to help germination, and build vigorous growth towards maximum yield.

Objectives of seed priming

Seed priming is another pathway to maximise nutrient uptake. This practice aims to build a more vigorous root system. During priming, nutrients are taken up by the seed. When sown, the elevated nutrients help early germination of the growing embryo through nutrient mobilisation. Roots emerging from germinating seed already have it's share of applied nutrients and empowers vigorous searching of soil nutrients and soil moisture. Using a seed primer gives your crop an early advantage for optimum growth and development.

For use with conventional and organic seed in:

- Horticulture Broad-acre Home garden
- Pasture improvement Feed stock improvement

Increased depth and breadth of nutrients for soil, plant, animal and human health

- | | |
|----------------|------------|
| Nitrogen | Boron |
| Potassium | Molybdenum |
| Phosphorus | Cobalt |
| Organic Carbon | Chromium |
| Calcium | Selenium |
| Magnesium | Nickel |
| Sulphur | Silicon |
| Iron | Strontium |
| Manganese | Zinc |
| Copper | |

Concentrate Application Guideline	
Usage	Application Rate
Broad-acre	Spray seed with 500 ml per tonne mixed with 3-4L of water
Pasture/ home gardens/ turf	Mix 1:10 with water then spray seeds 1-2 hours before planting Do not soak

Available in 1000L, 20L, 5L
